

Conflict Minerals Statement

In the U.S., Section 1502 of the 2010 Dodd-Frank Act and the related U.S. Securities and Exchange Commission rule that certain companies require to disclose the extent to which the products they manufacture or contract to manufacture contain so-called conflict minerals. This includes tantalum, tin, tungsten and gold sourced from mines in the Democratic Republic of the Congo (DRC) or adjoining countries that are used in and necessary for the function of many electronic components.

As a global distributor of electronic components, Endrich Group and its subsidiaries (hereinafter called "Endrich") fully understand the importance of this issue to its customers and promotes the traceability of these minerals and the transparency of the supply chain. Endrich does not purchase any conflict minerals from any source and endeavors not to purchase products containing conflict minerals that directly or indirectly finance or benefit armed groups in the DRC or adjoining countries.

Endrich is encouraging all of its suppliers to adopt similar policies, to only source minerals from responsible sources and provide Endrich and its customers with proper verification of the source of the materials used in the products they supply.
